PROFILE SUMMARY

Software Developer with 2.5 years of hands-on experience in PHP and Laravel, specializing in building robust and scalable web applications. Proficient in backend development, API integration, and database management, with a solid understanding of full-stack concepts. Committed to delivering high-quality solutions and continuously enhancing technical skills to grow as a full-stack developer.

EDUCATION

Sardar Patel University

Bachelor's Degree in computer Application (8.49 CGPA) 2019 – 2022

Gujrat Technological University

Masters of Computer Application (8.93 SPI) 2022 – 2024

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript, jQuery, AJAX, React.js
- **Backend:** PHP, Laravel, NodeJS, Python, MySQL,
- **APIs & Authentication:** RESTful APIs, Laravel Sanctum Authentication
- **Background Processing:** Laravel Queues, Jobs, Cron Jobs
- **Architecture & ORM:** MVC Architecture, Eloquent ORM
- **DevOps & Cloud:** AWS Deployment, Linux, Docker, CI/CD Pipelines
- **Performance & Monitoring:** Debugging, Application Performance Optimization, Laravel Optimization, Laravel Pulse
- **Version Control:** Git, GitHub

WORK EXPERIENCE

Software Developer (PHP Laravel Developer)

Svaapta IT-Ally Solutions Pvt Ltd – Vadodara, Gujrat 01/01/2024 – Present

1) **Caravan Project**

Description: - Contributed to backend development of a Laravel-based caravan listing platform with a Next.js frontend, building RESTful APIs and role-based Admin and Dealer panels for efficient caravan and media management.

Key Contribution: -

- Designed, developed, and optimized RESTful APIs for caravan listing, advanced filtering, and search functionality, ensuring efficient data delivery to the frontend.
- Implemented **image and video upload functionality** with validation (JPG, JPEG, PNG, SVG), storing media in **AWS S3** and converting images to **WebP** to improve performance.
- Improved application performance using **Redis caching** to reduce database load for frequently accessed data.
- Monitored and optimized backend performance using **Laravel Pulse**, identifying slow queries and request bottlenecks
- Designed and maintained **Laravel Eloquent relationships** with **soft deletes** across caravans, dealers, and categories to ensure data integrity.
- Implemented **secure authentication and role-based authorization** using Laravel middleware and supported **AWS/staging deployments**, including environment configuration and migrations.

2) Cloud Racing Project

Cloud Racing is a Laravel-based web and mobile platform that enables racers to seamlessly organize, manage, and participate in racing events.

Key Contribution: -

- Implemented multilingual support to enhance accessibility and expand the platform's global user base.
- Integrated Stripe payment gateway with subscription-based billing for secure and automated recurring payments.
- Designed and enhanced subscription management workflows, including plan creation, upgrades, downgrades, and cancellations.
- Contributed to core platform features such as user management and RESTful API development.
